Afghan Peer NSP

My name is Abdur Raheem Rajaey. I'm from Afghanistan, Kabul. I work for an organisation of the name Bridge/Pul.

This is the help of an organisation by the name of SAF (Sustaining Afghan Families). They give us syringe and condom and naloxone to distribute for people under the bridge.

Drug users should run needle exchange because all the people they trust us. They know each other very well. They come to us and if they have any problem they tell us. After that we discuss with the <people> in a high level the problem.

The advice I want to give someone who run peer needle exchange, to care of them, to listen to them and remember that drug users are the best teachers. We help our community.
